SUMMARY OF QUALIFICATIONS

Backend Software Engineer with **2+ years of experience** designing, developing, and maintaining scalable web and IoT-based systems. Strong expertise in **Node.js, TypeScript, RESTful APIs, and database design** using PostgreSQL and MongoDB. Experienced in **legacy system migration, microservices architecture, Elasticsearch-based search systems, and real-time communication using MQTT**. Working in **cross-functional teams** (Frontend, Mobile, DevOps, QA). Proven ability to take ownership as **PIC and sole backend developer** in production environments.

EDUCATION

University of Jember

Bachelor of Science, Computer Science
Emphasis, Web Development

Jember, East Java

January 2025

Major GPA: 3.7/4.00

RELEVANT COURSEWORK

Backend Developer, Software Engineering, Database Management, Frontend Developer

TECHNICAL SKILLS

Programming Languages

- JavaScript (Node.js), TypeScript, PHP, Python

Backend & Architecture

- Express.js, RESTful API Design, Microservices
- Prisma ORM, MVC & Modular Architecture

Database & Caching

- PostgreSQL, MongoDB, MySQL, Redis (Caching)

Search & Indexing

- Elasticsearch (Full-text Search)

IoT & Messaging

- MQTT

Cloud & Tools

- AWS (Deployment & Microservices), Git, Postman, Swagger

RELEVANT EXPERIENCE

Brighton Real Estate

Backend Developer

Surabaya, East Java

August 2025 – Present

- Backend Developer working in a **cross-functional engineering team** (Frontend, Mobile, DevOps, QA) within an enterprise IT environment.
- Maintained and enhanced a **legacy operational web system** built with **SilverStripe (PHP)**.
- Led backend **system migration** as the appointed **Person in Charge (PIC)**.
- Migrated legacy backend from **SilverStripe (PHP)** to a modern **TypeScript-based backend**.
- Designed and developed RESTful APIs using **Node.js, Express.js, TypeScript, and Prisma ORM**.
- Designed and managed **relational database schemas** and executed data migration with high data integrity.
- Improved system **scalability, maintainability, and development efficiency** through modern backend architecture.
- Integrated **Elasticsearch** for property and listing search with optimized indexing and query design.
- Improved search performance and relevance for large-scale property data using **Redis** (caching).

PT. Dawuan Slamet Mulyo*Backend Developer*Lumajang, East Java
January 2025 – July 2025

- Sole **Backend Developer** responsible for end-to-end backend system development.
- Designed and implemented scalable **backend architecture** from planning, development, to production.
- Developed and integrated backend systems for **IoT-based projects**, including:
 - APILL (Traffic Light Control Systems)
 - Road traffic CCTV systems
 - Road and environmental sensor devices
- Implemented **RESTful APIs** to connect IoT devices with client applications.
- Utilized **MQTT protocol** for real-time data communication and device messaging.

PT. Andalan Solusi Cemerlang*Backend Developer*Jember, East Java
July 2023 – January 2025

- Successfully build API for 4 website and mobile applications
- Be a main backend developer for some project
- Managing microservices

PT. Arkatama Multi Solusindo*Fullstack Web Developer Intern*Malang, East Java
January 2023 – June 2023

- Successfully build some feature in real client projects
- Successfully completed the internship assignments well
- Collaborate with fellow interns

PROJECT EXPERIENCE**Smart Traffic AJK, Backend Developer**

January 2025 – July 2025

- Served as a sole backend developer
- Build an API to connect Traffic Light Control System with client using ExpressJS and MQTT
- Designing databases using PostgreSQL

Sales Scanner, Backend Developer

April 2024 – January 2025

- Served as a backend leader and developed database for the application
- Build an API for website and mobile using ExpressJS
- Designing databases using PostgreSQL and MongoDB
- Deploy and Manage microservice using AWS

Pak RT, Backend Developer

October 2024 – January 2025

- Build an API for website and mobile using ExpressJS and Typescript
- Designing databases using PostgreSQL
- Deploy and Manage microservice using AWS

Sepakat, Backend Developer

July 2023 – April 2024

- Served as a backend leader and developed database for the application
- Build an API for website and mobile using ExpressJS
- Designing databases using PostgreSQL and MongoDB
- Deploy and Manage microservice using AWS

ORGANIZATION

Information Technology Student Association

July 2022 – June 2023

Head of Media and Technology Division

- Managing the division
- Create a new ideas for organizational content
- Develop and maintain organization website
